

CMBI Total Market Series

The CMBI Total Market Series provides users with publicly available and investable benchmarks that reliably and accurately track the value of cryptoasset markets that leverage the Datonomy to create Sector and Sub-Sector Indexes. The indexes are designed and constructed leveraging Coin Metrics proprietary network and market data metrics and methodologies, including the Adjusted Free Float, CM Hourly Reference Rates and CM Real Time Reference Rates.

Currently, CMBI Total Market Series include the Total Market Index, eleven Sector Indexes, and three Sub-Sector Indexes. Indexes are designed to accurately reflect the performance of the global market, be easily tradable and be readily accessible to market participants.

Features

Coverage

The CMBI Multi Asset Series provides coverage for the largest crypto assets in the market.

Objective

The multi asset series are designed for the creation of financial products including derivatives, index tracking funds and for use as a performance benchmark.

Investability

Assets included in the CMBI Multi Asset Series have been selected due to their investability in global markets.

Transparent

Index design and calculation follow a rules based process that is publicly available on the Coin Metrics website.

Price

Indexes are calculated based on price and total returns.

Availability

Multi asset indexes produce two differently calculated prices:

- Intraday prices that are available every 15 seconds
- Close prices that are available at end of day.
